Acoustics

Room acoustics, sound isolation, mechanical system noise and vibration, speech privacy, electronic sound systems

MGR's professional design team has the sound solution when it comes to acoustics. We take the time to review everything from start to finish. Building structure, shape, size, number of people, distance, materials and more all compromise great acoustics. We are skilled in everything from large gymnasiums and houses of worship to small conference rooms and recording studios. Our goal is for you to hear a pin drop.

Sound Systems

Stadium PAs, education and presentation aids, business music, listening media centers, houses of worship, portable systems

MGR's foundation was built on installing personal sound systems. We took this knowledge and expanded into commercial venues for new construction, renovations and upgrades. We support you by providing ongoing training, technical support, documentation, routine and preventative maintenance, and repair. MGR's sound expertise will blow you away no matter how large or small the venue.

Theatrical Lighting

Strobe, LED, stage, DJ, dimmer systems

MGR produces lighting effects that are inventive, eye-catching, and most of all, effective. We can highlight the attributes of your building, room or stage with dramatic or subtle effects. We consider the many factors that go into lighting design such as venue size, location, themes, controls and brightness. The results will be stunning.

Digital Signage

LCD, plasma, DLP® projectors

Delivering targeted messages and timely information is key to any business today. Digital signage solutions provides quick and easy management of those messages to your customers. MGR will design and recommend signage that provides the right interaction with the customer. We give you the benefit of easily exchanging content from anywhere, adding interactive animation, and enhancing the customer experience. A picture is worth a thousand words and digital signage can increase it to a million.

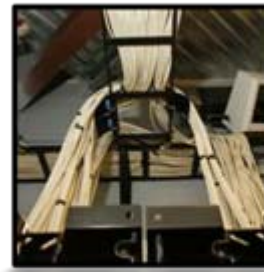

Multimedia Video

Pre and post, graphic software integration

Seamless digital integration of text, graphics, animation, audio, still images, and motion video is multimedia video. Add MGR's careful design with your needs for today and tomorrow in mind, our commitment to timelines, and you will deliver an incredible experience to your customers. From large projects to small, we will help you define your goals and build an infrastructure with components that will give your system the wow effect you want.

Structure Cabling

Voice/data, OSP, ethernet, fiber, data center construction

In today's information age, structured cable is the essential productivity component. MGR is recognized as the cutting edge designer of structured cabling systems that include voice, security, broadcast and CCTV applications. We have extensive experience in fiber optics that provide the reliable backbone of networks.

Security Systems

CCTV Surveillance, voice and motion monitoring, fire and burglar alarm systems, access card reader control, biometrics

Security systems help protect employees and assets, decrease liability risks, reduce insurance cost and ultimately provide a higher level of customer service. We will help you size and select the right security solution that offers cutting edge technology with affordability. We provide peace of mind for you and your business.

Video Conferencing

Monitors, screens, touchpads

MGR makes communicating across distances easy and more cost efficient. Our experienced development team focuses on your connection needs and delivers practical innovations that improve communications. MGR takes you to the head of the boardroom even if your meetings are on the other side of the world.

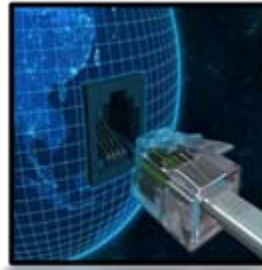

Project Management

Construction timelines, building infrastructure, specifications, details of logistics, scheduling personnel

Keeping a close eye on all aspects of a project is what MGR is known to do best. We believe establishing schedules, expectations, final testing and training are vital to a project. Providing quality systems to you is much more than buying a piece of equipment. It takes the knowledge and experience of an MGR project manager directing the work of a dedicated team from beginning to end.

Service Management

Call center, technical support

The consistent and reliable operation of your system is the backbone to your business success. We offer you prompt service with our 24/7 on-call service staff that is available to resolve issues or dispatch to the appropriate technician for your problem. Our service reps will make sure the problem is resolved and you are 100% satisfied.

Design Integration

MGR employs over 60 integrators and staff members nationwide that team together to provide the highest quality installation. We have internal networks that brainstorm, share product knowledge, and get the job done. We also work with a/v manufacturers and search for the newest technology for quality designs. We are proud of our ability to create, manage and deliver systems that exceed our customers expectations.

Full Service Rentals

Projectors, screens, lighting, PAs

MGR provides full service rentals and support for your event. Our experienced customer representatives will work with you to achieve your objectives. Whether it is a small conference, a DJ, or an audience of 5000, we can produce the right experience without you having to purchase equipment or resources.

Repairs

Warranty, preventive maintenance

MGR provides many services after the sale or installation of your new equipment. We will work with you to develop a custom maintenance package. Our service technicians are factory trained and certified. We provide onsite service as well as our own authorized service depot.

More on Services

Format Details

Acoustics

Room acoustics, sound isolation, mechanical system noise and vibration, speech privacy, electronic sound systems

Audio

Reinforcement, digital recording, backgrounds paging, home theater surround sound, home automation

Cabinetry

Production, broadcast, sound reinforcement and customer cabinets for homes

Control Systems

Analog, digital, radio controlled, infrared, RS-232, RS-485, Crestron, AMX, Zantek, Levitron, Lutron

Electrical Contractor Services

Full concept to full completion

Lighting

Classroom, A/V presentation, auditorium, theatrical, performance, intelligent, home

Multimedia

Pre and post, graphic software integration, LCD monitors, plasma, DLP projection

Measurement

Noise, reverberation, speech, intelligibility, delay

Planning and needs analysis

Architect facility design and evaluation, system verification, conflict resolution, contractor partnership recommendations

Recording

Live sound, project studios

System Tuning

CAD modeling, utilizing TEF, Smart Pro 1/3 octave real time analysis

Training

Owner, operator, end user workshops

Video

Live, post production recording camera systems, projection, LCD, plasma, DLP technology

Information Technology

Network design and implementation, fiber optic and copper, technical consulting, audio/video control transmissions via LAN and WAN, cable modem, DSL, WIFI systems, design build system integration, fire wire, virtual private networks

Telecommunications

PBX systems, lodging communications, voice over IP, internal and external paging, voice and data integration

Product workshops

Surveillance integration, computer systems operation, POS training, sound, acoustics, multimedia, theatrical lighting techniques and principals

Security

CCTV Surveillance, voice and motion monitoring, fire and burglar alarm systems, access card reader control, biometrics
